Mr. Bill Scogin  
Verde Environmental  
Micro-Blaze  
9223 Eastex Freeway  
Houston, Texas 77093

Dear Mr. Scogin,

I just wanted to tell you how thankful that we are to have used your MICRO –BLAZE wonder products.

Columbia Lakes Resort in West Columbia, Texas has been known to have tough conditions on The greens here, and your product just made our Resort Golf Course comeback of the year!

Your Micro Blaze Turf Care has made our roots grow way down into the soil and has given us the perfect percolation that we needed to have the best greens in the area.

Since we are close to the coast, we have a constant problem with “Black Layer”, and it has totally removed it from our greens and new growth has taken over in all of our poor areas.

It also eliminated the “Fairy Ring” within two weeks after application on our fourteenth green which has been there for more than fourteen years.

These Micro-Blaze products are some of the best that my superintendent Mike Sargent and I have ever seen. They have given us beautiful color, and thanks to the Microbe’s eating all of the fungus, your product converts all of the fungus back to Nitrogen.

Since everybody is going GREEN, your product will be a Home Run for all of us thanks not only to what it does for the golf courses, but also for our budget. Your prices are the best we have ever seen.

My superintendent and I would be very happy to endorse and recommend your Micro-Blaze to all of our fellow professionals.

Congratulations,

Bob Putt
